

Evidence, model mapping and laboratory document status.

Initial buyer edition / Version 1.0 / 07 Jul 2026

CURRENT STATUS

An EMC certificate is available for the HC-01 test model, mapped by the manufacturer to Sooye Studio DP-09. DP Series technical documentation has been submitted to a laboratory; review and issuance remain pending.

This overview separates issued third-party evidence, manufacturer-controlled documents and files still in preparation. It is not a substitute for a laboratory-issued test report.

CE / EMC Certificate of Compliance

Field	Recorded information
Certificate number	BZT20250714035EC
Referenced report	BZT20250714035ER
Applicant / manufacturer	Lufeng City Jiazi Town Hongchao Hardware and Plastic Products Factory
Product	Double-sided socket
Certificate model	HC-01
Sooye Studio mapping	DP-09 - manufacturer-confirmed same structure and electrical configuration
Directive	EMC Directive 2014/30/EU
Issue date	01 Aug 2025
Evidence form	Photographed certificate copy; digital laboratory report not yet available

Scope note: the photographed certificate identifies HC-01 as the main model and references test report BZT20250714035ER. The original wording and identifiers remain unchanged.

Unaltered certificate evidence

Photographed certificate copy. Perspective, reflections and physical condition are retained as received. This page is not a recreated laboratory certificate.

Family-level configuration statement

Manufacturer-confirmed available configurations: 110-250V~, up to 10A, maximum load up to 2500W at 250V~, with USB-A and USB-C options depending on the final model configuration.

Control item	Published treatment
Family	DP Series desktop / furniture power products
Ratings	Available configuration range; final product label follows the exact model and destination configuration
Plug / outlet / cable	Prepared according to destination-market and order requirements
USB functions	USB-A and USB-C options depend on the selected model configuration
Model evidence	Certificate, report and declaration applicability reviewed against the exact model

Laboratory submission status

Document stream	Status
DP Series technical documentation	Submitted to laboratory - review and issuance pending
Referenced EMC test report	Referenced by certificate - digital copy pending
RoHS / REACH supplier documentation	Manufacturer compilation and evidence review in progress
CB / IEC preparation	Preparation file available - third-party issuance pending

Manufacturer-controlled documents

Document	Status / use
Technical Construction File	Manufacturer draft submitted for review; controlled by model and revision
Critical Components List	Manufacturer working file; component evidence is added progressively
User Manual and Safety Instructions	Controlled template; final release follows exact model configuration
Rating Label and Packaging Warnings	Controlled template; final values follow product label approval
CB / IEC Safety Review Checklist	Laboratory preparation document; not a CB certificate
RoHS / REACH Supplier Declaration	Draft pending evidence review and authorized issue

Request current documentation

Buyers may request the current evidence status for an exact model, destination market and final configuration.
